CASHES POLICY

It is the philosophy of **JNS RESOURCES LIMITED** that accidents/injuries are preventable and therefore unacceptable in her organization. **JNS RESOURCES LIMITED** shall therefore integrate safety into her business and will vigorously pursue all Accident Prevention Programs through her well-structured and effective **system of CASHES** system.

JNS RESOURCES LIMITED services activities will therefore be organized, planned and executed in such a manner as to:

- Project and Promote the health of its workforce as well as conduct its activities in such a manner as not to adversely affect any third party (**JNS RESOURCES LIMITED** Community Inclusive).
- Avoid injury to any workers, sub-contractor and a third party that are either involved in or affected by **JNS RESOURCES LIMITED** activities.
- Minimize the impact on the environment in which operates.

Every employee of **JNS RESOURCES LIMITED** shall perform His/her work in accordance with this policy and work must be suspended when it is believed that essential safety systems are not in place.

Management and Supervisors will be accountable for the safety of the employees working under their supervision and will be expected to organize and conduct operations in a safe manner all the time.

Employees are reminded that they have the duty to take reasonable care of their own safety and the safety of others who may be affected by their actions or omissions and also to co-operate with statutory safety obligations which include adherence to company CASHES policy, rules and regulations.

The implementation of this policy is the responsibility of supervisors under delegated control and coordination of the CASHES Manager.

Managing Director

JNS RESOURCES LIMITED is committed to sound HSE Management System through the provision of a framework for action and setting of HSE objectives and targets.

We are committed to protecting the health and safety of our employees, contractors and other stakeholders, safeguarding the environment and prevention of pollution through the implementation of an effective HSE management system based on competent personnel and a proactive HSE culture;

It is our policy to

Enhance proper waste management through measures that encourage minimization, recycling and the reuse of processed waste.

Develop and maintain adequate emergency response procedures/plans and resources to mitigate the impact of incidents and/or accidental releases of oil, gas, or hazardous chemicals, and test systems for effectiveness.

Recognize and reward those who contribute to improved HSE performance.

Provide adequate resources and training programmes to ensure that employees, contractors and stakeholders are aware of and trained on our HSE requirements and abide by them.

Maintain safe operations in all our activities, provide safe facilities and equipment that are properly designed, engineered, constructed, maintained and operated.

Strive to minimize the environmental impact of all our operations, to identify and minimize risks and to prepare to take appropriate actions should an incident occur

Adhere to all federal, state and local government regulations as relates to our core business activities.

Ensure continual improvement on the HSE Management System; and

That each of us, at our own level, to manage the risks inherent in our own activity and in that of our teams. This duty is an integral part of operational management.

This policy shall apply to all employees, contractors, and subcontractors of **JNS RESOURCES LIMITED**

The Managing Director of **JNS RESOURCES LIMITED** shall maintain and uphold this policy and provide guidance for its respect.

Managing Director

QUALITY POLICY

As specified in the **JNS RESOURCES LIMITED** Quality System it is our Quality Policy

“To supply a Quality product, meeting customer requirements and international standards, to the satisfaction of customer and to build customer’s confidence”

The quality of all the jobs executed by us will not only meet the client’s satisfaction but will also stand the test of time.

Quality Objectives

The Quality objectives are

The completed facility will comply with the Project specifications, with all government regulations, statutes and permitting requirements and with sound generally accepted engineering & construction practices.

That the Engineering Design is clearly documented and consistent with minimum acceptable Design Standards and meets operating performance requirements.

That the equipment and materials procured and installed in the facility are consistent with the Engineering Design.

That the Fabrication and construction meet the client Directives, Rules and Specifications

That the facility safely starts, operate, and stop as designed and safe to the operator.

That documentation of objective evidence of conformance to the requirements is maintained and recorded for the work and retrievable.

Managing Director
